

## Contemporary decorative insect control

Developed as contemporary and discreet solution for insect control, **Satalite™** is ideal for use in restaurants, bars, cafes and other front of house applications. **Satalite™** is proven to be more effective than standard decorative flykillers and incorporates patented technology which ensures all of the glueboard is fully utilised. The glueboard is positioned equidistantly from the tube ensuring there are no areas of glue too far from the tube to be effective. Available as an 18 or 30W unit, **Satalite™** can be mounted either vertically or horizontally and both units are designed for use with genuine **GLUPAC™** pheromone impregnated glueboards, which incorporate UV stable dry glue for longer life and an increased catch.

### Features

#### Stylish and effective insect control

Ideal for front of house applications

#### Flexible and easy installation

Horizontal or vertical mounting

#### Patented glueboard positioning

Proven to be more effective at catching flies

#### High efficacy UV tubes

Proven to be more effective and longer lasting than standard UV tubes

#### Innovative glueboard technology

Designed for use with **GLUPAC™** pheromone impregnated glueboards with UV stabiliser

#### Robust construction

All metal construction

#### Independent certification

Independently tested and certified to RoHS and relevant European standards

#### Complete peace of mind

One year guarantee (excluding tubes)

### Specification:

Part No.	Model	Dimensions(mm)	Coverage	Tubes	Weight
ZL020	Satalite 18	300x300x110	30m <sup>2</sup>	1x18W	1.5Kg
